

Home automation evolution

Cherubini META ecosystem for intelligent control of the sun protection.

EXPECT MORE

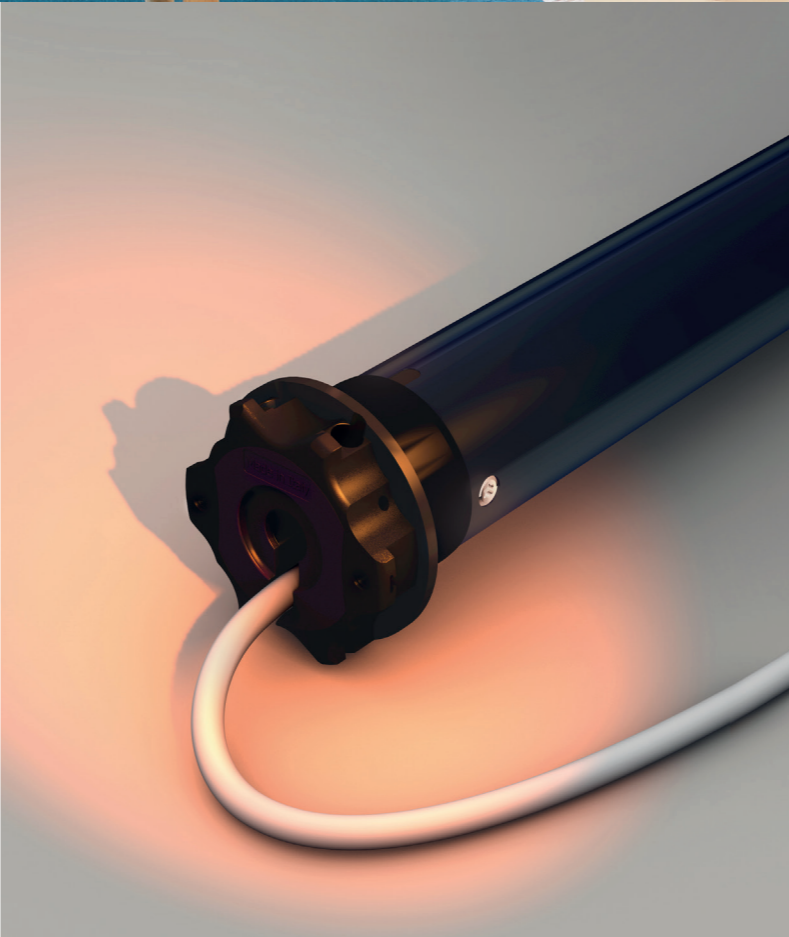

CHERUBINI

Our smart home concept is in continuous evolution.

Solutions designed for an increasingly connected world: open motors and systems through shared protocols.

A new system open to innovation.
Starting with the motor.

It all starts with the dual radio patent created for our new generation of motors.

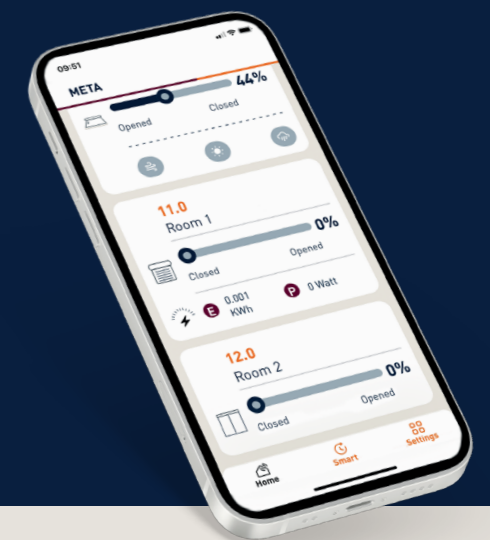

Create your ideal scenario.

META system receives and manages data from sensors and devices, activating events and scenarios according to your preferences.

You are always in control of your surroundings, monitoring and optimizing consumption for a more sustainable building without sacrificing maximum comfort.

Safety

Find out how easy it is to be sure that the blinds are closed to protect the windows, the awnings retracted to shelter in case of sudden bad weather and the garage and gate closed for maximum safety. Just configure an event or a scene in METAHome and at the set time or simply at your command, home and office are protected and monitored at any time from your smartphone. In addition, thanks to the compatibility of the META system with various modules on the market, you can expand the smart functions related to security, integrating the most appropriate devices for your needs.

Comfort

With the METAHome App you can set a few simple rules to open and close curtains or shutters as well as turn the lights on and off and manage the brightness and color of the lamps. Thanks to the integrated brightness sensor, the METAHome gateway autonomously ensures the desired degree of brightness for the environment, optimizing electricity consumption.

Energy saving

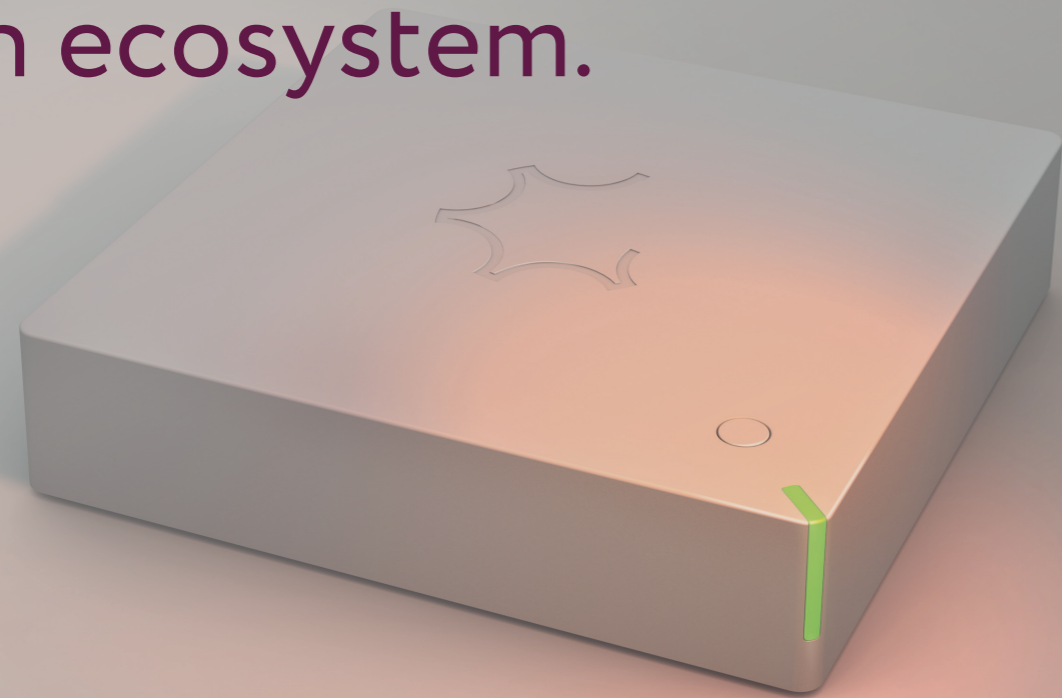

The METAHome gateway integrates internal temperature and humidity sensors, detecting the conditions of the environment. So you can set automatic functions that can contain energy consumption, activating the opening and closing of screens and curtains at various times of the day according to the sunlight to optimize the air conditioning of the environment. In addition, by expanding the system with other compatible devices, you can include the monitoring and activation of air conditioners and heating devices in the events and scenarios. Everything from your App.

Convenience

The META system also allows you to manage the opening and closing of gates and garage doors via gateway and App: you can program scenarios and commands, check the closing status from anywhere, access comfortably by activating the opening on your arrival by car.

METAHome, more than a gateway: an open ecosystem.

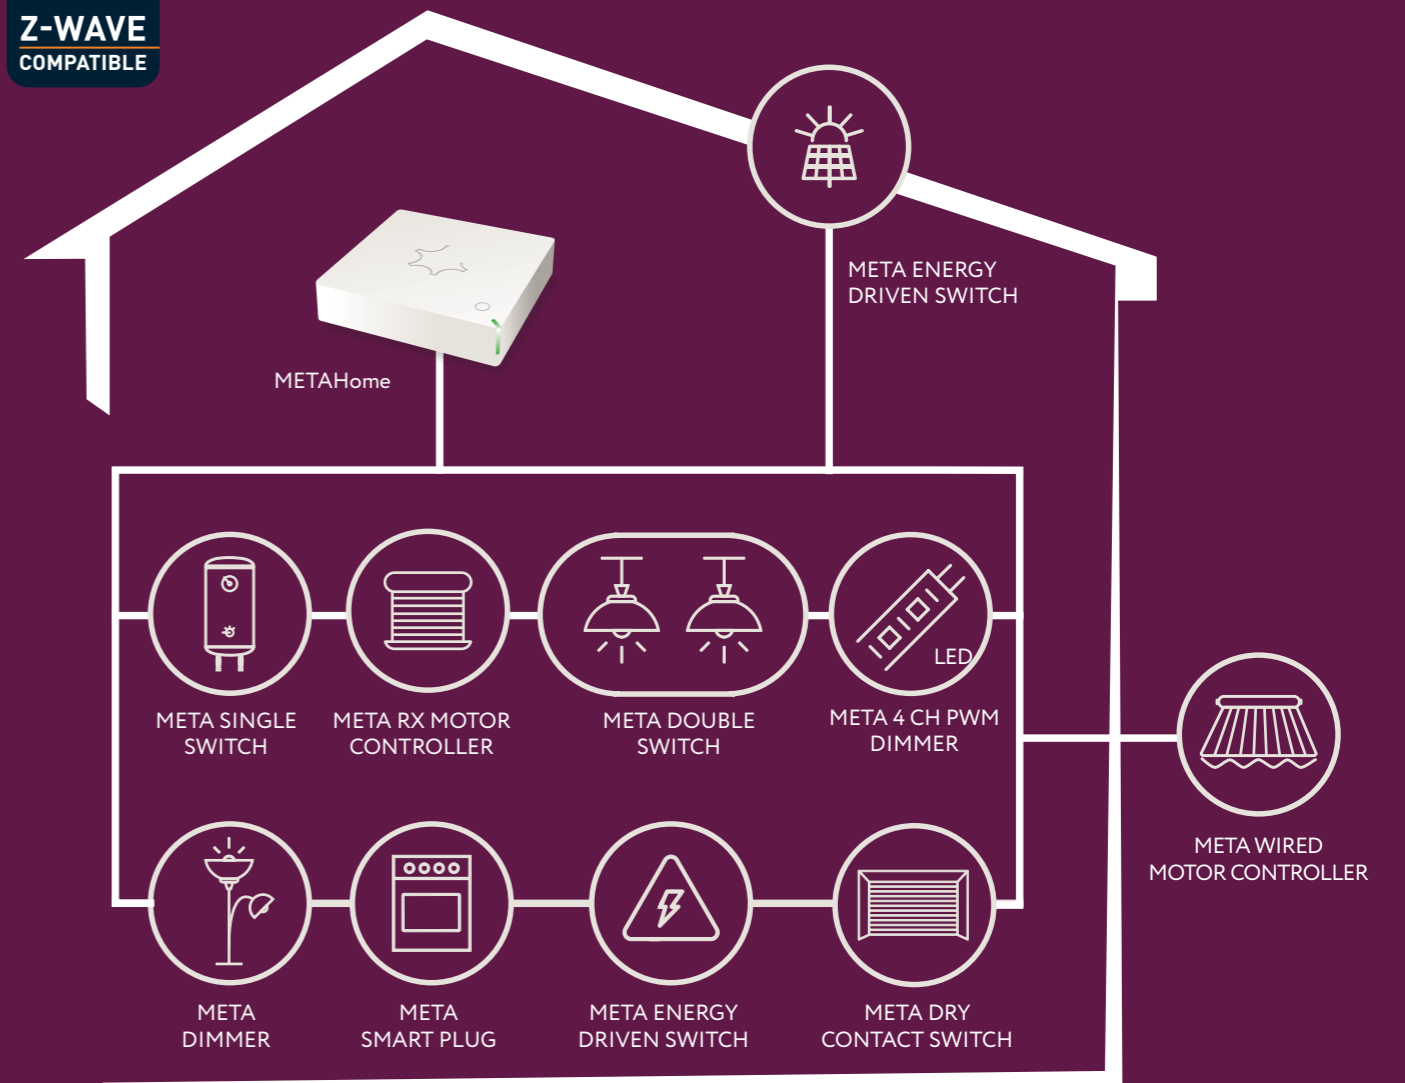

The METAHome gateway allows the integration of both Z-Wave and Radio Cherubini Remote Control CRCRX devices in a single system, offering a set of functions for Smart Home.

METAHome integrates perfectly with all Cherubini Remote Control CRC RX radio motors and can therefore be integrated with existing installations.

-  METAHome Gateway Warm Gray
-  METAHome Gateway Burgundy
-  METAHome Gateway Blu

METAHome allows the home management via the App, setting scenarios and automatisms for:

- Blinds
- Awnings and screens
- Heating/cooling
- Lighting
- Garage door/gate
- Google Home and Alexa voice assistants

Available for iOS and Android mobile operating systems.

DISCOVER
META

Bi-directional ZRX range, a new motor concept.

Thanks to the dual radio, the ZRX motors offer the same advantages and ease of programming as the Cherubini range, plus perfect integration within Smart Home systems.

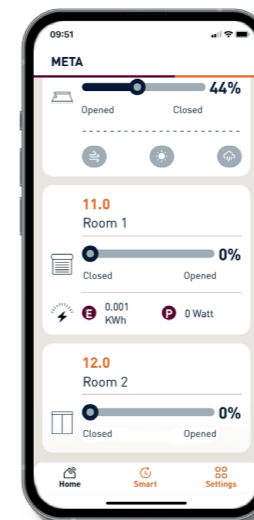

Our new generation of dual radio motors integrates Cherubini Remote Control CRCRX and Z-Wave radio protocols.

OPEN ZRX for roller shutters, ORA ZRX for awnings, REBIS ZRX for screens, DIMIO ZRX for all types of adjustable shutters and INSTA SHORT ZRX il motore più compatto per avvolgibili, are the result of our dual radio patent with the aim of creating the best system for smart solar protection control.

DUAL RADIO

CRC RX

META App: total return of information.

The motor keeps its status aligned for any type of command received:

- via cable via button or switch,
- via radio CRC RX by remote control,
- via the Z-Wave network,
- via voice assistant (Google Home and Amazon Alexa),
- via App with tablet or smartphone.

OPEN ZRX

The double radio motor for roller shutters.

ORA ZRX

The solution for awnings.

REBIS ZRX

Created for technical curtains and screens.

DIMIO ZRX

Designed for perfect control of roller shutters with adjustable blades.

INSTA SHORT ZRX

The most compact double radio roller shutter motor (length 343 mm).

With META you can integrate a series of actuators and sensors that can be managed from the META App.

Amazing features, in the smallest modules on the market.

- Very small size: the smallest modules available on the market
- Easier installation thanks to SmartStart technology
- Longest transmission range: over 100 meters
- Reduced consumption and greater energy efficiency
- Long life: Zero Crossing contact protection technology
- S2 security: the communication of each device is protected by advanced encryption standards
- Scenario activation
- On / off with both switches and buttons
- Extremely precise consumption measurement
- Personalized reactions to alarms

Dimmable led

Light 230V on/off

Small appliances connected to the mains (230v) through controlled socket

Cherubini mechanical motors or any other brand

Installation consumption meter

Garage doors and gates
